

**DEPLOYABLE LABEL DISPLAY SYSTEM**

5

**ABSTRACT**

A label display system includes a deployable label base to display labels, such as regulatory and/or certification marking labels, for an electronic and/or portable computing device. The deployable label base moves between a first position and a second position, where the labels are viewable in the first position, and where at least some of the labels are concealed from view in the second position. The deployable label base includes a first side to display labels and at least a second side to display labels. The deployable label base can be flexible and include or encase a security cable to secure the electronic and/or portable computing device.
